### Councill

This two-piece flip-top console with ribbon-stripe mahogany veneer is unique for its dramatic cyma curve ends. New at Fall Market this piece is ideal as a sideboard that converts to additional table space when the rear legs swing to support the top in the open position. Details include a reeded edge, blind frieze drawer, and striking faceted legs that terminate in brass ferrules and casters. [www.councill.com](http://www.councill.com), 336.859.2155.
