Councill

By marrying the company's traditional roots with modern styling, Councill has developed the Brownstone line. The inspiration of noted furniture designer John Black Brownstone bridges the classic and urban aesthetics. Reflecting Georgian, Louis XVI, Neoclassic, and Biedermeier periods, the designs are executed in mahogany, macassar ebony, and mozambique. To complement the line, designer Randy Culler brings his contemporary vision to Brownstone upholstery by creating sleek silhouettes and familiar forms, edited by clean, modern lines. 200 Steele Building 3rd floor, 200 Steele St. Tel: 336.889.0616, www.councill.com.
