

In the Details

High-end furniture designers present luxurious detailing on their showpiece cases, tables and accent furniture. Such standout treatments—exotic veneers, Old World distressing, bas-relief carvings and signature motifs—send both quality and value cues to the consumer when, at times, the marketplace appears to be a sea of sameness. Zoom in to discover that the delights are in the details.

Sarah Gayle Carter partnered with Council Furniture this spring to launch her high-end accent furniture line, *Ardier*. Swallows, symbols of both welcome and prosperity, adorn several pieces in the collection—a flock assembles along the scalloped apron of *Hirondelle* console (above). For a more Deco-inspired look, the table is offered in a second color scheme: *Aubergine* with antique silver birds (left). **CIRCLE 354**
